

Modcom Institute of Technology

Final Projects Guide.

Slide 2: Problem Definition

Every Project Begins with a Problem Definition.

What is the problem?

Explain the Problem the Project aims to solve.

Example: “Yoghurt businesses don’t have a proper online presence, and customers aren’t sure which yoghurt is best for their health—especially for children or people with dietary restrictions.”

Slide 3: Your Solution

What's Your Solution?

How will you solve the problem?

How will your solution work?

Be clear and practical.

Example;

Create a web app where customers can easily order approved, healthy yoghurts while also learning about the health benefits.

The app will feature product information, including benefits (for kids, adults, sugar-free options, etc.), pricing, and delivery details.

Make Payment - Lipa NA MPESA

Product Name :llara Yoghurt

Product Cost: 180

Enter phone 254XXXXXXXXXX

Make Payment

For Android, Show Apps Screenshots

For Data Science and ML – Show 3 Graphs, Model Used, Score, Prediction

Slide 6: Target Market

Who is your app targeting

- Explain who will use your Solution.
- Example
 - Parents with young Children
 - Yoghurt Lovers

Slide 7: Revenue Model

How will you make Money using your Solution

- Example
 - Through Advertising.
 - Through Subscription
 - Pay per download
 - Sell the App
 - In App Purchases

Slide 8: Requirements

Essential Requirements:

Mandatory Attendance: You must attend all project sessions to receive full marks.

Seek Guidance: Make sure to ask for help from your lecturer whenever needed to ensure your success.

Attendance is Critical: Failure to attend will result in zero marks for attendance.

Presentation is a Must: You must present your project to graduate

Slide 9: Marking Scheme

Project out of 100%

20 Marks – Project Period Class - Attendance

20 Marks – Problem Definition

10 Marks – Creativity

30 Marks – Implementation/Coding

10 Marks – Presentation Skills

10 Marks – Response to Questions

THANK YOU
